一般的兩輪轉向手推車難於轉彎
Difficult to turn in face-to-face mode for normal 2-swivel wheel stroller

一般的兩輪轉向手推車在面對面模式時會常遇到以下的2個問題：

Following two points are common problem for the normal 2-swivel stroller in face-to-face mode:

- 轉換把手方向後，後車輪變成前車輪令到轉向有限制，在轉彎時很容易撞上障礙物或牆身。
After reversing the handle, the rear wheels, which are without swivel function, are switch into the front position and become difficult to turn at corner.
- 媽媽需繞圈來遷就車輪轉向位置，不能順滑轉彎。
Mothers always need to wind around for turning, this cannot turn the corner smoothly.

MiracleTurn
